- Spearheaded the **creation of a responsive E-commerce website**, enhancing user satisfaction by 17%.

Technologies

Languages: JavaScript, PHP

Technologies: HTML, CSS, Bootstrap, Tailwind CSS, GSAP, React JS, Next JS, MongoDB, NodeJS, Git, GitHub, GitLab, Linux, Shopify, Shopify Liquid, Vercel, Render, Netlify, **AI Tools (Cursor, Claude, ChatGPT, Antigravity)**

Projects

- Vectorshift(YC Backed Startup) Clone** [GitHub](#) | [Link](#)
- Created a drag-and-drop workflow builder using **React Flow** and **Zustand**, enabling connections between 10+ pipeline nodes with **real-time state updates**.
 - Implemented **DAG-based** pipeline validation logic to analyze node and edge relationships, achieving 100% accurate detection of valid workflow structures through automated pipeline analysis.
- Food Ordering App** [GitHub](#) | [Link](#)
- Worked on a **full-stack food delivery platform using the MERN stack**, implementing **JWT-based authentication**, real-time order tracking, cart management, and Stripe payment integration (test mode), while reducing API response times by 25% through optimized state handling and efficient backend data flow.
 - Integrated **Auth0 authentication**, securing 100% of user workflows and improving application security.
- Book Store** [GitHub](#) | [Link](#)
- Crafted a **MERN stack** book store application with complete **CRUD** functionality, increasing data management speed by 50% and reducing system errors by 20%
 - Checked the UI and made improvements, **leading to 35% faster navigation and response times**.
